

Dear Colleagues,

We would like to continue the short sequence of workshops

- "Workshop on the density concept", Bratislava, May 2004
- "Rencontres Arithmétique et Combinatoire", St. Etienne, June 2006

with the workshop

"Sequences", Ostrava, September 3rd to 5th, 2007.

Main topics (list not exhaustive):

- Additive number theory
- Block sequences and their characteristics
- Combinatorial number theory
- Continued fractions
- Densities on sets of positive integers
- Diophantine approximations and diophantine equations
- Distribution of sequences
- Metric number theory
- Probabilistic number theory

Time period of the workshop ties with the traditional Czech and Slovak Conference in Number Theory which will be held from August 27th to 31st in Smolenice, Slovakia.

Papers from the workshop can be published in the journal Uniform Distribution Theory (<http://udt.mat.savba.sk>).

If you are interested in participating, please let us know to any of the following addresses:

Rita Giuliano-Antonini, Dipartimento di Matematica, Largo Bruno Pontecorvo 5, 56127 Pisa, Italy (giuliano@dm.unipi.it),

Georges Grekos, Université de Saint-Etienne, Mathématiques, 23 rue du Dr. Paul Michelon, 42023 Saint-Etienne Cedex 2, France (grekos@univ-st-etienne.fr),

Ladislav Mišík, Faculty of Sciences University of Ostrava, 30.dubna 22, 70103 Ostrava, Czech Republic (ladislav.misik@osu.cz).
